

Band-It Universal Elbow Support/Forearm Band

Manufacturer:
Airway Surgical

BandIT Therapeutic Forearm Band is the only medically designed device which works with the human anatomy to aid in the relief of Carpal Tunnel Syndrome and Tennis Elbow pain without cutting off circulation, hampering movement or causing uncomfortable swelling. The BandIT uses selective pressure to turn the natural action of the forearm into a pump by compressing across the flexor, extensor and supinator muscles.

Band-It Universal Elbow Support/Forearm Band

FEATURES:

Airway Surgical

- Aids in the relief of Carpal Tunnel Syndrome and Tennis Elbow pain without cutting off circulation
- Uses selective pressure to turn the natural action of the forearm into a pump
- Unlike other bands which create a tourniquet effect and can cause uncomfortable tissue swelling
- BandIT Therapeutic Forearm Band allows normal circulation (blood flow). Simple to apply and it works in a completely new and unique manner
- One size fits most arms.
